Please be aware of any signs posted on the patient's door. These signs require visitors to check with the nurse before entering the patient's room.

Visitors with colds, flu or contagious illnesses should not visit.

## Pet visitation

Many people find that having their pet visit them in the hospital can help them feel better. In many cases this can be arranged. If you would like a visit from your pet, here are some things you need to know: You must be in a private room for your pet to visit. Your pet must be brought in on a leash or in a cage with a person that will monitor it. Your pet is not allowed in other hospital areas outside of your room. Please ask your nurse for more information.
