## **Advanced and Aurora Health Care. Anticipating the future.**

"We believe integrated health care is the most effective way to deliver care for our patients. That means coordinating care across a wide range of services, making sure we are offering the right care, at the right time and in the right place. It is the way health care should be, and it also makes things easier for our patients and their families. With the new Aurora Medical Center to be built in Grafton, we will be able to achieve this kind of care.

I'm excited about this project because it will give my patients a choice when it comes to inpatient care. Aurora's new medical centers are very different from other hospitals. The focus is entirely on the patient, from the design of the building to the philosophy of care. I know my patients will appreciate features like bedside admitting, private rooms with home-like furnishings, and unlimited visiting hours, plus the most advanced diagnostic and treatment options – all close to home.

I have cared for patients in the Grafton area for 24 years, and I hope to do so for many more years. I am proud of the care we provide at Advanced Healthcare, and my colleagues and I are pleased to be able to help bring this new medical center to our community."
