## Advanced and Aurora Health Care. Anticipating the future.

“Integrated health care is the ideal way to give patients the sense of comfort and confidence they want. It allows us to coordinate a patient’s care from start to finish.

That’s why the new relationship between Advanced and Aurora is so promising. With two great staffs now together as one team, we can collaborate to provide the best care for each patient. From physicians and nurses to pharmacists and therapists, we can focus on what’s right for each individual.

This is a great moment for the community. The new Aurora Medical Center to be built in Grafton will offer the latest advances in diagnostics and treatment options, along with features like private rooms, unlimited visiting hours, bedside admitting and Aurora eICU Care. All of this will help guarantee that our patients have the best experience possible.”
