Family Medicine
Aurora Health Center, Port Washington

Advanced and Aurora Health Care. Anticipating the future.

“This is a growing community with ever-changing needs. Our affiliation with Advanced Healthcare and the building of a new regional medical center in Grafton assures that the families in our community will continue to receive the best possible health care with their personal physician, close to home.

The new Aurora Medical Center in Grafton will bring leading-edge technology and treatment options to the community. It will also offer an approach to care that reduces the stress of a hospital stay and promotes healing. The new hospital will offer unique, personal amenities like unlimited visiting hours, meals when patients want them and a quiet home-like environment.

I’m proud to say that Aurora and Advanced both put the patient at the center of everything we do. And now with a larger network of physicians, convenient locations and the new regional medical center, patients in our community will have access to all the care they need, wherever and whenever they need it.”
