Profile

Tanvir Bajwa, MD, is a highly accomplished Milwaukeearea physician, best known for his technical expertise in advanced interventional cardiac and peripheral vascular procedures.

He has participated in and designed several scientific research protocols to treat such conditions as peripheral vascular disease, renal artery disease, abdominal aneurysms and carotid artery disease. He also serves as an advisor to many device companies.

In fact, Dr. Bajwa remains among only a handful of cardiologists in Wisconsin authorized to perform some of the most advanced procedures currently available. Dr. Bajwa continually shares his research and findings with the medical community.

He has authored two books, 30 articles and 52 abstracts. In addition, he presents annually at local symposiums and national conferences. Dr. Bajwa was trained as a fellow in cardiology and coronary angioplasty at Aurora Sinai Medical Center, where he also serves on the faculty in a variety of appointments, including Associate Head, Cardiovascular Disease Section; Director, Cardiac Catheterization Laboratory; and Director, Peripheral Vascular Laboratory.
