

Can asthma education actually help kids learn?

We think so.

Treat a child for asthma and you give her hope. Teach a child, her family, her teachers and friends about asthma and you change her life. It seems simple enough – so why hasn't it been done that way all along? We pondered that question, then introduced the Aurora Asthma School. Teaching everyone how to recognize the signs of asthma, how to control triggers, how to use medications and much more. And Asthma School isn't just a place at Aurora Health Care facilities. We take it on the road to where we can help most, including schools and day care centers. Good places to start considering that, nationwide, asthma is to blame for children missing more than 10 million days of school each year.

Controlling asthma is just one of the many Care Management initiatives of Aurora Health Care. For complete details visit us online at www.AuroraHealthCare.org or call 1-866-4HEALTH.
