

Shoo the Flu!

& pneumonia too

Wiping Out the Flu, One Shot at a Time

Annual flu shot schedule

Influenza (flu) is a contagious disease which can be spread by coughing, sneezing or nasal secretions. Each year thousands of people die from influenza and even more require hospitalization.

No appointment necessary

**Cash or check,
Medicare part B,
Medicare Advantage Plans,
and Medicaid accepted
as payment.**

Must be age 9 or older
(A parent or guardian must be present with any child under age 18.)

Annual flu shot: \$30

The Centers for Disease Control and Prevention (CDC) recommend that all people **6 months of age and older** should get an annual flu vaccine (must be age 9 or older to receive from Aurora VNA).

Young children, people 65 and older, pregnant women, and people with certain health conditions such as heart, lung or kidney disease, or a weakened immune system – can get much sicker from influenza. Vaccination is especially important for these people who are at higher risk of severe influenza and their close contacts, including health care personnel and close contacts of children younger than 6 months.

Pneumococcal shot: \$65

A pneumococcal shot is recommended if you are:

- Age 65 or older
- Under age 65 with long term health problems
- Under age 65 with a disease or condition or taking a drug or treatment that lowers the body's resistance to infection
- Under age 65 and have asthma or smoke cigarettes

Usually only one dose of PPSV is needed, but under some circumstances a second dose may be given. Ask your doctor for more information.

For flu shots in Dodge, Kenosha, Milwaukee, Ozaukee, Racine, Walworth, Washington and Waukesha counties, visit Aurora.org/Flu.
