

# Shoo the Flu!

& pneumonia too •

Wiping Out the Flu, One Shot at a Time

## Annual flu shot schedule

*Flu is a contagious disease that causes a lot of illness, hospitalizations and deaths. Starting in 2010, it is recommended that everyone age 6 months and older get vaccinated against flu every year.*

*No appointment necessary*

**Medicare Part B plans accepted as payment**

**Must be age 9 or older**  
*(A parent or guardian must be present with any child under age 18.)*

*Aurora Visiting Nurse Association of Wisconsin provides health care solutions that enable people to remain independent within their communities.*

*For flu shots in Kenosha, Milwaukee, Ozaukee, Racine, Walworth, Washington and Waukesha counties, visit [www.Aurora.org/Flu](http://www.Aurora.org/Flu).*

## Annual flu shot: \$30

*Annual flu vaccination is now recommended every year for everyone over 6 months of age. While everyone should get a flu vaccination each flu season, it's especially important that the following groups get vaccinated either because they are at high risk of having serious flu-related complications or because they live with or care for people at high risk for developing flu-related complications:*

- Anyone age 50 or older
- All children (must be age 9 or above to receive from Aurora VNA)
- Pregnant women
- Anyone with long-term health problems
- Residents of nursing homes and other chronic-care facilities
- People who live with or care for those at high risk for complications from flu, including:
  - Health care workers
  - Household contacts and caregivers of people age 50 and older or anyone with medical conditions that put them at higher risk for severe complications from influenza
  - Household contacts and out-of-home caregivers of children less than 6 months of age (these children are too young to be vaccinated)

## Pneumococcal shot: \$55

*A pneumococcal (pneumonia) shot is recommended if you are:*

- Age 65 or older
- Under age 65 with long-term health problems
- Under age 65 with a disease or condition, or taking a drug or treatment that lowers the body's resistance to infection
- Under age 65 and have asthma or smoke cigarettes
