

Shoo the Flu!

& pneumonia too •

Wiping Out the Flu, One Shot at a Time

Annual flu shot schedule

Flu is a contagious disease that causes a lot of illness, hospitalizations and deaths. Starting in 2010, it is recommended that everyone age 6 months and older get vaccinated against flu every year.

No appointment necessary

Medicare Part B plans accepted as payment

Must be age 9 or older
(A parent or guardian must be present with any child under age 18.)

Aurora Visiting Nurse Association of Wisconsin provides health care solutions that enable people to remain independent within their communities.

Annual flu shot: \$30

Annual flu vaccination is now recommended every year for everyone over 6 months of age. While everyone should get a flu vaccination each flu season, it's especially important that the following groups get vaccinated either because they are at high risk of having serious flu-related complications or because they live with or care for people at high risk for developing flu-related complications:

- Anyone age 50 or older
- All children (must be age 9 or above to receive from Aurora VNA)
- Pregnant women
- Anyone with long-term health problems
- Residents of nursing homes and other chronic-care facilities
- People who live with or care for those at high risk for complications from flu, including:
 - Health care workers
 - Household contacts and caregivers of people age 50 and older or anyone with medical conditions that put them at higher risk for severe complications from influenza
 - Household contacts and out-of-home caregivers of children less than 6 months of age (these children are too young to be vaccinated)

Pneumococcal shot: \$55

A pneumococcal (pneumonia) shot is recommended if you are:

- Age 65 or older
- Under age 65 with long-term health problems
- Under age 65 with a disease or condition, or taking a drug or treatment that lowers the body's resistance to infection
- Under age 65 and have asthma or smoke cigarettes
