

Abdominal Wall Fellowship

Nicole Hadjiloucas, MD

Hometown: Edison, NJ

Undergraduate Degree: Biological Sciences from Rutgers University

Medical School: St. George's University School of Medicine

Why I choose Abdominal Wall Fellowship: I drawn to abdominal wall reconstruction because it combines the technical complexity of advanced surgery with the opportunity to profoundly improve patients' quality of life. I value the challenge of restoring form and function in cases of complex hernias, and I'm inspired by the continual innovation in biomaterials, robotics, and surgical planning. This field allows me to be both a meticulous technician and a creative problem-solver, which aligns perfectly with my passion for purposeful, patient-centered surgical care.
