

## PGY2 Cardiology Residency

---

### Austin Padilla

**Previous Education:** PharmD - Concordia University Wisconsin School of Pharmacy

**Short Bio:** I'm from Oshkosh, WI but have lived in/near Milwaukee for the past 9 years. Being a true Wisconsinite, I love going to breweries. Also, I enjoy being outdoors, watching sporting events, watching superhero movies, and spending time with family and friends.

**Factors Considered Most Important When Choosing Residency:** Important factors for me were the wide variety of rotations, finding the right fit, PGY2 options, and the opportunity to precept students.

**Why Aurora?** Aurora offers all the opportunities that I am looking for in a residency and align with my short- and long-term goals. What stood out to me was their enthusiasm, preceptor commitment, and culture within the department.

**Current rotations:** Cardiovascular ICU, Coronary ICU, Pulmonary Hypertension, Cardiothoracic Transplant, Electrophysiology, Heart Failure Clinic

**Year-long project:** Implementation of an Antithrombotic Stewardship Program

**Future:** My plan is to pursue a position within AAH and hope to find a practice area where I can care for cardiac patients.
